DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: The first paragraph of the specification should be updated to include the current status of the parent applications.

Also, it appears that the filing date of 10/423,692 was incorrectly entered as April 24, 2003 and should be changed to April 25, 2003 to be consistent with the patent office records.

Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 2-4 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 31 of U.S. Patent No. 6,565,624 in view of Kotliar (5,799,652). The patented claims fully encompass and envision the limitations of the instant claims except that the oxygen concentrator is located inside or outside of the enclosed environment and provides oxygen depleted air to the enclosure. Kotliar '652 discloses an arrangement for a hypoxic enclosure having an oxygen concentrator inside or outside of the enclosure (see 15 in figure 2, 34 in figure 4, col. 3, line 25). It would have been obvious to one

Art Unit: 1724

having ordinary skill in the art at the time of the invention to locate the oxygen concentrator either inside or outside of the enclosure in order to install the concentrator in a desired location as suggested by Kotliar (col. 8, lines 15-40).

4. Claims 1-13 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,827,760. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims fully encompass and envision the limitations of the instant claims, especially when read in light of the specification.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference to Tkatchouk (6,009,870) discloses an apparatus for hypoxia training.
